Book Series Call for Papers

“Open Technology Applied Frontiers”

Tentative Title of Edition: **Engineering Models and Technology Optimization**

Mission and Objectives

Models and Simulation methodologies, devices and solutions have been considered to optimizing technology-enabled objectives in current challenging world of technologies. As a highlighting issue on contemporary engineering solutions; presenting a new face of modeling and simulation on Engineering has been disseminated and devoted among of engineers, technicians and modeling experts. Due to presenting new shapes and visions of technology enhancement and optimization using engineering modeling and simulation techniques, this edition is designed for covering gaps between theoretical and applied issues on contemporary and emerging visions of Engineering Modeling and Simulation.

Theme and Scope

Submissions in all of related scopes and themes of the edition will be considered. Some important topics with the most relation to chapters themes include, but not limited to:

- Artificial Intelligence
- Biosystems and Computational Bio-Analysis
- Cognitive Computing: Theories and Applications
- Computing-Aided Systems
- Engineering Rehabilitation: Solutions and Techniques
- Forecasting on Engineering Applications
- Grid and Parallel Processing Computing
- High-tech Systems: Devices and Applications
- Information Engineering and Retrieval Applications
- Knowledge-based Engineering and Computing Solutions
- Machine Learning Technology & Applications
- Methodologies on Engineering Modelization and Simulation
- Natural Language Processing
- Signal Processing and Speech Recognition

Submission

Authors must submit their prepared manuscripts according to the style of book series (enclosed to this announcement in 8-20 pages) directly via the "Online Submission System" UNTIL 20 December 2017:

<http://otaf.cambridgejournals.org/otaf/index.php/otaf/issue/view/1>
<http://otaf.cambridgejournals.org/otaf/index.php/otaf/about/submissions>

Review results will be announced to corresponding authors until 10 January 2018 and the releasing date of the issue has been scheduled for the last week of January 2018.

Upon receiving submission acceptance notification, Authors will charge a minimal processing fee (125 GBP per accepted chapter) need to being paid before processing for publications.

Authors from low and middle income countries [1] will have the opportunity of using a processing charge waive as 40% and need to pay 75 GBP per accepted chapter.
